

Product Information No. 01-2012

“DRAWER 160 INOX Light”

Drawer 160 INOX Light is an evolution of the successful Drawer 160 INOX COMBO. This unit works on **12/24V** and is available in three versions: a double-drawer set up, which offers both a fridge and a freezer solution OR both drawers are fridges OR both drawers are freezers. The Drawer 160 INOX light has a mechanical thermostat and internal light on the upper drawer except on double freezer version.

Features and Benefits

- Compact and elegant design
- Easy access, comfortable to use
- Robust drawer mechanism
BLUM guides, the best from the domestic appliances units

Features and Benefits

- 3 side fixing frame for a flush mounting installation.
- Doors are in stainless steel AISI 304.
- Power installed 12/24V DC SECOP compressor: BD50F on the FRIDGE/FRIDGE version, BD80F on the FRIDGE/FREEZER and FREEZER/FREEZER versions.
- AC/DC SECOP electronic unit can be installed on the Fridge/Fridge model with BD50F compressor.
- On the other two models with BD80F compressor (Fridge/Freezer and Freezer/Freezer versions), a special power pack needs to be mounted as this compressor doesn't support the AC/DC electronic unit.

Features and Benefits

- Internal light on Fridge/Fridge and Fridge/Freezer versions. Not available on Freezer/Freezer model.
- Fridge/Fridge version is ventilated; this generates a more uniform temperature. Casing and fan are positioned on the upper drawer but the ventilation is present on both compartments.
- Mechanical thermostat on the upper drawer (positions from 1 to 7).
- Power consumption:

DR160 Light fridge/fridge 530W / 24 hours (12V)

DR160 Light fridge/freezer 1100W / 24 hours (12V)

DR160 Light freezer/freezer 1100W / 24 hours (12V)

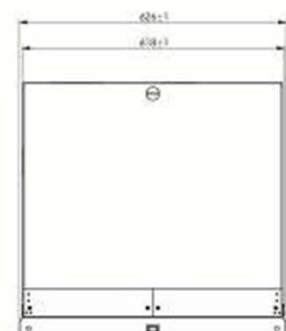

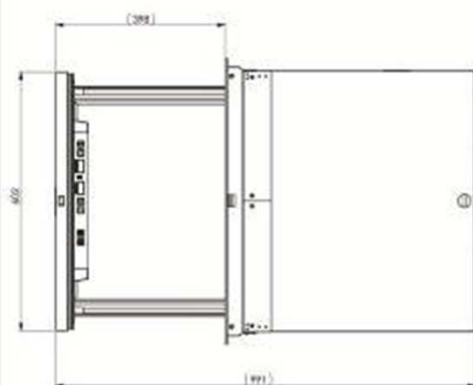

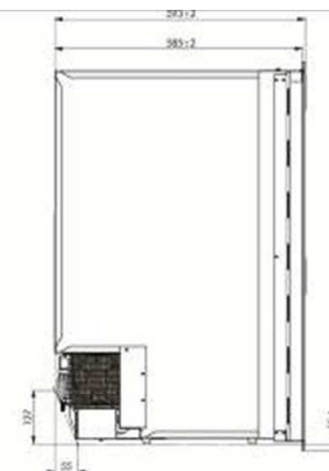

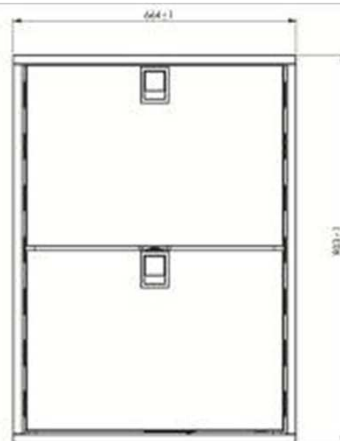

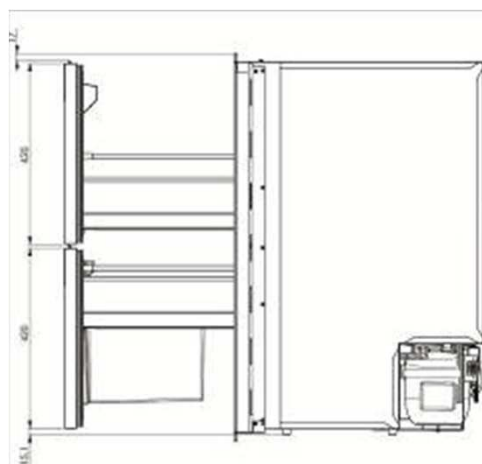

Features and Benefits

- Mechanical thermostat, positioned inside the upper drawer, for an easy control of the temperature
- Internal traditional light as on Cruise Line.
- The fan, positioned in the upper drawer, generates a more uniform temperature in the fridge compartment.

Specifications

- AUTOMATIC defrost on the Fridge / Fridge version while on the other two models it works as in traditional fridge/freezers for domestic appliances. This means automatic defrost on the fridge compartment and MANUAL defrost on the freezer compartment.
- Product's dimensions in mm 865H x 627W x 610D (fridge & fridge/freezer versions) 865H x 627W x 590D (freezer version);
- The subdivision of the internal volumes is almost identical on all three models. Being a total of 160L gross volume, the upper drawer is a 95L compartment and the lower one 65L.
